

TOTAL COMFORT - CARRIER FACTORY AUTHORIZED DEALER INTRODUCES THE INFINITY CONTROL

For 28 years, Total Comfort Heat and Air-Conditioning, an Ormond Beach-based company, has been a leader in Flagler and Volusia counties in the residential and commercial heating and air-conditioning business.

The company consistently is one of the first to provide the latest technology and service to its customers.

This year, in keeping with that tradition, Total Comfort introduced the most recent, up-to-date system produced yet, the Infinity Heating and Cooling System by Carrier.

"It's the world's smartest air-cooling, heating system. It's actually a user interface," says Dan Hucks, the company's founder and president.

He explains that the Carrier Infinity control system, functions as a complete, efficient control to not only set heat or air-conditioning temperature but also controls humidity, fan speed, ventilation and monitors efficiency."

The system is a first in the industry. It allows the user to program the settings for up to a week.

Lynda Hucks, co-owner Total Comfort demonstrates the ease of use of the Infinity Control.

Hucks adds that not only does the Infinity Control provide more control over the air quality and comfort level than any other system available, it is affordable and comparable in cost to other systems.

"It's very user friendly to operate. It's very intuitive as far as anyone being able to program it," Hucks says.

The figures on the system's screen are larger, brighter and significantly more readable than previous models.

"It's easily programmed, easily operated," Hucks says .

Not only does the system control the temperature, providing the most comfortable in-home climate, including humidity and air quality, but also the system keeps track of the efficiency of both the heat and air-conditioning, adjusting each when needed.

Total Comfort is proud to have earned Carrier Factory Authorized Dealer designation, and Hucks is proud his company offers the latest in Carrier's technology. Total Comfort also supplies the Infinity System's 17 heat pump and air-conditioner (with environmentally sound Puron refrigerant).

erant).
